- Did you know astronauts study sand in space?
- Did you know NASA astronauts will recycle water in space?
- What is nanotechnology?
- What is NASA doing about airplane noise?

NASA'S KSNN™ explains the everyday phenomena of our world, corrects misconceptions, and answers frequently asked questions. This series of 1-minute, web-based videos features kids investigating math, science, technology, computers, geography, and NASA Facts. The series is designed for kids in kindergarten through fifth grade but is flexible enough to interest anyone who wants to know how things work or what makes things happen. In addition to the 1-minute web-based videos, educators can visit the KSNN™ web site for a follow-up written explanation, activities, related print and electronic resources, and a computer-graded quiz. Visit NASA's KSNN™ today to access these exciting new, FREE resources.
